(Please see the explanation and form)

How does it work? Once you purchase the amount of Super Bowl Squares that you would like, your name will be randomly added to a grid of 100 squares. For example, if you purchase 3 squares, your name will be randomly added to the grid 3 times. The grid will also contain the numbers 0-9 randomly placed for each team in the Super Bowl (see EXAMPLE). At the end of each quarter of the Super Bowl, the score will determine who wins for the quarter. For example, if the score at the end of the 1st quarter is 3 to 7. Team A has 3 points and Team B has 7 points. Team A's score of 3 will intersect with Team B's score of 7. If your name is on that square, you are a winner! If the team has a two digit score, for example 14, the number in the ones place value is used to determine the winning square.

Please return the bottom of this form and money to Ave Maria by **Wednesday, February 7th.**
